VAUGHAN'S  
Super Swiss Giant  
Pansy Mixture

*Vaughan's Super Swiss Giant Mixture*

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick

petals, of a rich velvety texture, give this strain of Pansy the required substance so necessary to a perfect Pansy.

We have made a special mixture from three or four growers' stocks. Many of the flowers are five blotched. All the vivid colors of the type are represented in their enormous size and wavy and crinkly flowers. Trade pkt., 75c;  $\frac{1}{8}$  oz., \$1.40;  $\frac{1}{4}$  oz., \$2.50;  $\frac{1}{2}$  oz., \$4.40; oz., \$8.00.

# Vaughan's <sup>The</sup> World's <sub>Best</sub> Flower Seeds

## Order Early to Avoid Shortages Due to War.

War conditions have greatly delayed deliveries of certain flower seeds from European growers. While we are promised additional supplies of some of the varieties listed herein, and expect them to arrive safely, there is always the possibility of disappointment. The rule as to stock on hand must be: **First come, first served, and therefore we urge that you send in your orders early to make sure of filling your requirements in full.**

Buyers of seeds are dependent upon the experience, ability and integrity of the seedsmen to insure the quality and identity of the seeds they buy. Our customers are protected by the skill of an organization which for more than sixty years has specialized in seeds for florists.

Carl Cropp, vice president of Vaughan's Seed Store since 1884, and his son Carl Jr., are in touch with expert growers throughout the world. By frequent inspection trips, and careful checking in our trial gardens, they make sure that we supply you with the best seeds obtainable in the world.

**TESTING AND TRIALS** Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds. This summer we conducted a series of approximately eight hundred trials of various varieties further to check on the reliability of our seed.

**Flower Seeds for Summer Sowing.**—We issue a special catalogue in June. Should you fail to receive one, please write for it.

**For Seeds of Perennials and Biennials,** see pages 34 to 47.

**Trade packets** contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of ¼ lb. and over are charged at the pound rate; unless stated otherwise, ½ lb. is at the oz. rate; ½ oz. is at the ounce rate only when the price per ounce is 20c or more and ½ oz. rate is not otherwise quoted.

We do not sell ½ oz. where the price per ounce is 15c or less.

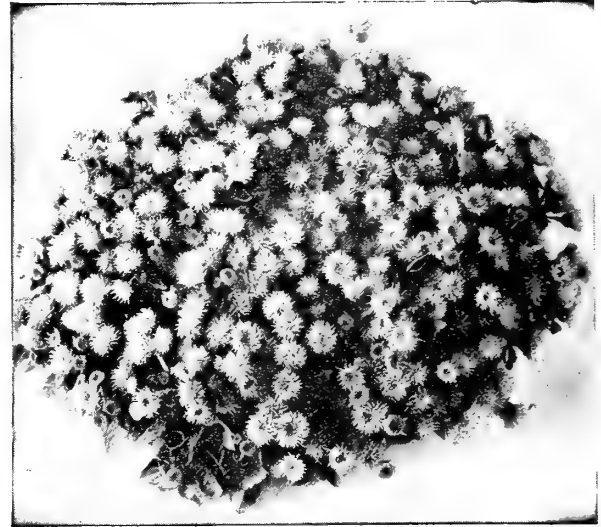

**Cash Discounts on Flower Seeds:** On all orders for flower seeds totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed.

ASTER GIANT BRANCHING

**Asters**  
**WILT-RESISTANT**

Asters have been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt-Resistant Strains, which, although grown in infected soil, proved immune to the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers, and the only way to overcome this is to grow the plants under a cloth cover.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

**ASTERMUM—2 feet**

The plants are of strong upright growth with 12 to 15 strong stems 20 inches long, each carrying a flower of perfect form.

**Annual Larkspur**

For outdoor blooming start in flats in the house, shift into 2-inch pots and plant in April or so v in the open as soon as ground is ready. To get satisfactory germination from Larkspurs in the hot weather, it is necessary to chill the seeds in an ice box for several days before sowing. Larkspurs must be grown cool. For a greenhouse crop in May, sow in January or February.

Annual Larkspur bought in the wholesale market was suspended in a cool, airy spot where it was allowed to dry for 60 days. When taken out it had not shattered and the color upheld.

PANSY VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

## Pansies—Continued.

Pansies have long been a favorite with us. We introduced the Swiss Giants to American gardens and named and introduced the lovely Canadian variety, Maple Leaf, several years ago.

Each year we make extensive tests of all pansies in our greenhouses in Western Springs (this year we used two houses exclusively for them). The plants are checked for trueness of color and type and the mixtures for balance of color harmony. Next spring make a note to come out and see them during March and April.

**How to Sow Pansy Seeds.** Sow the seeds in a cold frame in light soil without any fertilizer. Cover the seeds very lightly with the same soil and keep moist. Shade the seed bed with cheesecloth or a muslin screen, and as soon as all the plants are up remove the screen. Or you may sow them in a large pot or seed pan.

To be sure of fine, strong Pansy plants, we suggest the following, applied as a top-dressing by the end of March or early April.

2 parts dried blood.	2 parts steamed bone meal.	1 part potash

### GIANT MIXTURES

#### VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, yellows, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 50c; 1/8 oz., \$1.20; 1/4 oz., \$2.20; oz., \$8.00; 2 oz., \$15.00.

#### VAUGHAN'S SUPER SWISS GIANT MIXTURE

We have made a special mixture from three or four growers' stocks. Many of the flowers are five blotted. All the vivid colors of the type are represented in their enormous size and wavy and crinkly flowers. See inside front cover for illustration in color. Trade pkt., 75c; 1/8 oz., \$1.40; 1/4 oz., \$2.50; 1/2 oz., \$4.40; oz., \$8.00.

#### SWISS DWARF MIXED

For those who desire a dwarfier plant than the original type, we have had our grower make this selection. The colors are the same as in the original strain but the plant itself is considerably shorter. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00.

#### VAUGHAN'S MAPLE LEAF GIANT MIXED

A distinct variety we introduced several years ago, having very large leaves and flowers of gigantic size, 4 to 5 inches across, perfectly round, of heavy substance in many attractive colors and color combinations. Trade pkt. 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00.

#### VAUGHAN'S SUPER MAPLE LEAF MIXTURE "CANADIAN GIANTS"

This strain is even finer than the above, with flowers of unbelievable size and texture, larger than in any other strain, the plants are also of compact growth and the extra large foliage is a rich, dark green. Trade pkt., 75c; 1/8 oz., \$1.50; 1/4 oz., \$2.65; oz., \$10.00.

#### VAUGHAN'S GIANT MIXTURE

Besides a good share of the "Fancy" strains such as Masterpiece, Swiss Giant, etc., this mixture contains all the self colors such as white, yellow, blue, purple, red, bronze, etc., and is probably the best "general" high grade mixture obtainable. All the flowers are of the "Giant" type. Trade pkt., 50c; 1/4 oz., \$1.25; oz., \$4.00.

#### VAUGHAN'S INTERNATIONAL MIXTURE

This is a mixture of special strains such as Bugnot, Masterpiece, Swiss Giants, Triumph of the Giants, Boulogne Giants—all 3- and 5-spotted flowers of largest size and great substance in the most varied colors and color combinations. Since this mixture contains but very few self colors, such as white, blue and yellow, these should be ordered separately if desired. Trade pkt., 50c; 1/8 oz. \$1.00; 1/4 oz., \$1.80; oz., \$6.00.

#### GENEVA GIANT MIXED

#### Vaughan's Long Stemmed Winter-Flowering Reselected Mixed.

This strain is the result of a great amount of individual plant selection work and represents the finest strain of Long Stemmed Pansies that we have ever seen. It has a much wider color range than other Winter-Flowering strains and has an excellent stem length, averaging better than 10 in. The bloom size is from 2 1/2 to 3 in. and the flowers are of very good substance and sweet scented. Sow in summer for Midwinter blooming and give support early. See illustration in color on inside front cover page taken in our greenhouses at Western Springs. Trade pkt., \$1.00; 1/8 oz., \$2.00; 1/4 oz., \$3.65.

PETUNIA ALL-DOUBLE TYPE

**PLEASE NOTE:**

Highly bred double petunia seed is not as vigorous in growth as is that of single strains. To some extent this lack of vigor extends to the seed. Seed of our all-double strains has been carefully tested in soil, and, if carefully handled, we know it will germinate 60-70%. For this reason and because of its high cost we cannot entertain claims of non-germination of this seed. If handled with due care, we know it will grow.

## Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals; quite a few may be forced; others make fine pot plants; and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

LUPINUS POLYPHYLLUS RUSSELL

## Russell Lupinus

### A MARVELOUS SELECTION OF PERENNIAL LUPINS

Most unusual colors and color combinations; some flowers are self colors and many bicolors, the standard being of one color and the keel of another. The flowerettes are much larger than the other Polyphyllus varieties. The spikes are crowded with blossoms and resemble a closely set well rounded column of Sweet Peas. Useful as a cut flower.

The Russell Lupins have three virtues not including colour, that the older varieties lacked. Ability to travel well when cut, less tendency for the lower flowers to fade before the whole spike is out and excellent keeping qualities in the house.

Grown from originator stock seed. Trade pkt., 25c; 1/4 oz., 50c; oz., \$1.60; lb., \$18.00.

Reselected seeds, originator's Green Seal packets: 20 seeds, 40c; 65 seeds, 90c, 120 seeds, \$1.60, Net.

Cut newly opened flowers either early in the morning or in the late evening and immediately (within five minutes of cutting) burn the ends of the stems at the gas range or electric range for a depth of two inches. Burn them well until the ends are charcoal and glow red when taken from the fire. Then put them in fresh water and your Poppies will last from three days to a week in the house, or you can put them in full sun and they will stand up two or three days, or until the petals drop, without wilting. And very few even so-called fine cutting flowers will stand up like this in the hot sun.

DOUBLE BEGONIA

ACHIMENES

## AMARYLLIS

Large Flowering Hybrids

One of the finest strains of Amaryllis we have ever seen, raised by eminent growers whose stock and hybridization for many years we have purchased in its entirety. Flowers are immense, borne as a rule four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains.

## ACHIMENES

This is closely related to the Gloxinia. Plant 6 to 7 bulbs in a 5-inch pot, or 9 to 10 in a 6-inch pot. The soil used for potting should be rich in humus and of an open, porous nature, allowing perfect drainage. A good mixture to use is equal parts of loam, leaf mold and sand. About one-third of the depth of the pots or pans should be occupied with drainage. After the young growth appears, great care should be taken to keep the soil moist for a single severe drying will ruin the plant. Blooming time 8 to 10 weeks after planting.

## BEGONIAS

Tuberous-Rooted

Every florist should grow some of these bulbs, as they make showy plants that find ready sales in the spring and summer. Use 4-inch pots and shift later to 5 and 6-inch pots if larger plants are wanted. A compost of one part rotted cow manure to two parts loam and one part leaf mold will give good results. Water sparingly until growth is started. They like a 55-58 degree temperature at night.

# Vaughan's Cannas

In our list of sorts will be found all the good old standard kinds, and many of the best novelties, the inferior kinds being discarded every year as the merits of the newer ones are proven.

Price for Dormant Roots up to APRIL 1st, after which pot plants are ready. All have green foliage unless otherwise specified; 25 at 100 rate; 250 at 1000 rate. Not less than 25 sold wholesale.

## The Big Four

**\*Improved Florence Vaughan** Owing no doubt to a deterioration in breeding stock, plants distributed under the name of Florence Vaughan have for several years been decidedly smaller, and inferior in color to the original variety, introduced by us. Making a search for stock of the original quality, we found it in Europe, and have propagated from carefully selected specimens to produce the improved type offered here. Giant flowers of vivid golden yellow, sprinkled with fine red dots, are borne on strong 4-foot stems. In our judgment, the best of all yellows. Per 100 Per 1000  
Green foliage..... 10 for \$1.00 \$7.00 \$60.00  
3-inch pot plants..... 14.00 120.00

**\*King Humbert** 4-FT. SCARLET FLOWERS, BRONZE LEAVES, GREATEST FAVORITE TODAY. This remarkable "Gold Medal" Canna has been the sensation of the past nine years. It is a cross between the orchid-flowering and the French or Crozy type, combining the best features of both, the large flowers of one with the free-blooming character of the other, and the handsome broad, tropical foliage. Dormant roots... 3.75 32.50  
3-inch pot plants..... 11.00 100.00

**\*Yellow King Humbert** 4 feet. An orchid-flowering sport of the well known variety King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 in. across; individual petals 3 to 3½ in. in diameter. Color of flower a deep rich yellow, softly spotted and blotched with bright red. Some plants will occasionally give a scarlet or scarlet-striped flower, which we consider an improvement rather than a defect. Dormant Roots..... 3.75 32.50  
3-inch pot plants..... 11.00 100.00

**The President** 4 ft. In color a rich glowing scarlet with immense rounded flowers seven inches across when fully open, produced on strong, erect stems well above the large green foliage. Free-bloomer and strong grower. Dormant Roots..... 3.75 32.50  
3-inch pot plants..... 11.00 100.00

### PENNISETUM CUPREUM

The dark bronze Fountain Grass so much admired at A Century of Progress. Does well in any sunny location with rich soil. Foliage and plumes are dark bronze and plants make a wonderful display from late July to frost. 2½-inch pot plants..... \$2.50 doz.; \$15.00 per 100

Cannas are becoming more popular. The new varieties with large flowers in new colors are unequalled for creating a colorful show from July till frost. They do best in full sun and respond quickly to feeding.

Number of Cannas required for round beds planted eighteen inches apart each way: Seven feet—19 plants, one for center; six for first row; twelve for second row. Ten feet—37 plants, one for center; six for first row, twelve for second row, eighteen for third row. ## POMPON AND DECORATIVE COMMERCIAL VARIETIES

The term pompon is applied to those varieties which are of the true rounded type, and those very nearly approaching this type.

Decorative varieties are those which are a distinct departure from the rounded type. Their flowers are less compact, partly reflexed and display more of the color of the inner side of the petals.

# Vegetable Plants With a Pedigree

## Vaughan's Seeds of Table Quality Varieties are a Sure Selling Specialty

ONE of the most profitable spring crops for the greenhouse or hot-bed plant is seedling vegetable plants for home gardeners. Grow your plants from Vaughan's seeds and advertise the fact. It will bring you discriminating customers and higher prices. On this page we describe some of the varieties which we recommend for vigorous and fast selling plants.

For other varieties, see the vegetable list on the following pages or write for a copy of our retail catalogue, which gives a complete list of vegetables with full descriptions. By advertising that your plants are grown from Vaughan's seeds you will attract custom from the thousands who have received this catalogue.

### YELLOW- RESISTANT CABBAGE

Through the cooperation of the Wisconsin Cabbage Growers and the University of Wisconsin, we are enabled to offer seed of yellows-resistant cabbage from lots which have been tested in the university trials.

These lots of seed are carried under stock numbers as itemized below, and orders for these numbers will be filled as long as the seed lasts. When the tested lots have been exhausted, we will supply at regular prices new crop seed grown from tested stock seed, which should have resistant qualities equal to the parent stock.

Percentage of yellows disease which developed in Dr. Vaughan's tests is shown for each numbered lot as follows:

Jersey Queen, stock 171C or M, 0%; All Head, stock 174R or S, 10%; Racine Market or Detroit, stock 186A, 10%; Wisconsin All Season, stock 191C or R, 4%; Wisconsin Hollander, stock 225W, 0%; Globe, stock 211S or A, 1%; Red Hollander, stock 194W, 1%; Marion Market, stock 206C, 4%; Wisconsin Ballhead, stock 215B, 0%.

In addition to the above, we offer seed of Bugner, 205S, from the same lot which was used by market growers at Racine, Wis., in 1939 with complete satisfaction, which experience we consider equal to a state test.

Seed of the numbered lots specified above is offered at an advance of \$1.00 per pound, 35c per ¼ lb., 10c per oz., over the regular prices for same varieties as hereafter quoted.

**Resistant Golden Acre (Racine Market).** Matures in about 60 days. The earliest yellows-resistant cabbage yet developed. A solid, round head of excellent flavor, crisp and tender. Oz., 60c; ¼ lb., \$1.75; lb., \$6.00.

**Marion Market.** 75 days. The third yellows-resistant cabbage to mature. Of an excellent Copenhagen Market type, though later than select Copenhagen, coming a short time before Glory of Enkhousen. Oz., 65c; ¼ lb., \$2.00; lb., \$6.00.

★**Globe.** 80 days. The resistant Glory of Enkhousen is but 3 to 4 days later than Copenhagen, of excellent flavor. You who think that there is no difference in the flavor of cabbage should compare a mature Globe with any other cabbage. Pkt., 15c; oz., 65c; ¼ lb., \$2.00.

### Standard Bred Cabbages

**Reselected Copenhagen Market Extra Early.** Matures in about 62 days. Earliest of the large heading cabbages, maturing even before the conical types. Market growers have reported their entire crop of this strain harvested before heads from other seed of this variety were ready to cut.

Reselected Tested Stock. Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

**Golden Acre.** Matures in about 60 days. This early round headed variety is slightly earlier than our reselected extra early Copenhagen Market and is similar in most other respects, except that its heads are slightly smaller, weighing 4 to 5 lbs. Oz., 45c; ¼ lb., \$1.25; lb., \$3.50.

**GOLDEN ACRE DANISH GROWN.** Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

**Glory of Enkhousen.** Matures in about 80 days. This globe-shaped, medium early variety is of excellent flavor and crispness, producing heads weighing eight to ten pounds, and more uniform than the earlier types. Oz., 30c; ¼ lb., 85c; lb., \$2.50.

### Cauliflower Vaughan's New Snowball. Matures in about 55 days. For early out- door planting and forcing, as well as for late sowing for the fall crop, this variety is standard. A well grown head measures 9 to 10 inches across with depth in proportion and a perfectly white core.

CRIMSON  
CUSHION  
Pkt., 10c.

CALIFORNIA WONDER

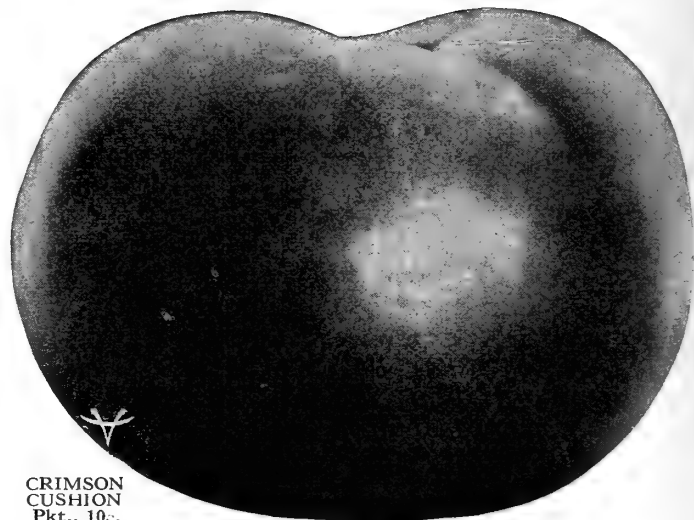

### Peppers

**Vaughan's Giant Magnum Dulce.** This fine mild pepper can be grown to immense size—seven inches long and 4 inches through—but when grown so large the yield is small. To get a large yield of medium sized peppers, pinch off the "king flowers," the first ones to open. Pkt., 15c; ½ oz., 35c; oz., 65c; ¼ lb., \$2.00.

**California Wonder.** A mild, sweet, mid-season variety, very large, measuring 4½ inches in length by 4 inches in diameter. It resembles Chinese Giant in form, but has much thicker flesh. It has a crimson fruit. One of the heaviest peppers grown, not as prolific as some, but much more desirable. ½ oz., 35c; oz., 65c; ¼ lb., \$2.00.

**Large Bell.** Large blocky fruit, usually mild. ½ oz., 25c; oz., 45c; ¼ lb., \$1.25.

**Crimson Giant.** One of the earliest large red sweet peppers. In habit the plant grows two and one-half feet high and bears a large quantity of fruits. The peppers are large, deep green when young and a rich red when ripe; flesh thick, sweet and mild. Pkt., 10c; ½ oz., 30c; oz., 50c.

### Standard Bred Tomatoes

**Bonny Best.** 103 days. A shade later than John Baer. Smooth, large and uniform fruit; yields well until frost. Oz., 30c; ¼ lb., 90c; lb., \$3.00.

**Crimson Cushion or Beefsteak.** 120 days. Is very large, round and regular; bright scarlet skin, solid flesh of best quality, seed cells small. Plants are very prolific, fine appearance. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; lb., \$4.75.

**Ponderosa—The Giant Tomato.** Matures in about 118 days. Of the large fruited varieties, this one is most popular. Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

**Oxheart.** Matures in about 120 days. Popular because of its shape, large size, and excellent table qualities. Not a heavy yielder. Skin pink, almost seedless; firm, sweet flesh. Pkt., 10c; oz., 65c; ¼ lb., \$2.00; lb., \$7.50.

**Golden Ponderosa.** 118 days. A yellow gem. Equal in size to that magnificent variety. Oz., 60c; ¼ lb., \$1.75; lb., \$6.00.

**Vaughan's Select Earliana.** 94 days. Earliest large, smooth bright red tomato. Compact in growth, with stout jointed branches; the vines yield well and the fruit is solid and of fine quality. Oz., 45c; ¼ lb., \$1.25; lb., \$4.00.

**John Baer.** 108 days. Extra early red. Not quite so early as Earliana. John Baer yields a much heavier crop of larger, more uniform and more attractive fruits. Oz., 30c; ¼ lb., 90c; lb., \$3.00.

**Dwarf Stone.** The Largest Dwarf Tomato. 132 days. The fruit is red, and specimens weighing ¾ pound are not uncommon. Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

### Tomatoes

#### For Plants Resistant to Wilt

**Early Baltimore.** 108 days. Illinois University selection, thriving on all soils; smaller fruit, brighter color, heavier yielder than Marglobe. Oz., 45c; ¼ lb., \$1.25; lb., \$4.00.

SEED CERTIFIED by Michigan State Experiment Station. Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

### Resistant Celery

**Michigan Golden (College Golden).** Developed at Michigan State Agricultural College. A new strain of self-blanching celery resistant to root rot or crown rot "Fusarium Yellows," bred from the tall strain of Golden self-blanching. Pkt., 40c; ½ oz., 85c; oz., \$1.50; ¼ lb., \$5.50.

For other varieties see complete vegetable list on the following pages.

### Egg Plant

**Black Beauty.** 110 days. Twelve days earlier than New York. In shape it is broad and thick, perfectly spineless and smooth; beautiful, rich purple color and handsome lustre. Oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

# Vaughan's High Grade Fertilizers

Prices for Florists F.O.B. New York.

The Yield and Quality of Vegetation Depend Upon Continuous and Rapid Growth.

It has been demonstrated that crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Plant food of the right amount and kind controls the yield and quality of prod-

ucts more than any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

## Vaughan's Lawn and Garden Fertilizer. (5-8-6)

Five percent nitrogen; eight percent phosphoric acid; six percent potash. This mixture differs from our balanced plant ration in that it is composed of plant foods in mineral form. The advantages of mineral fertilizer include the absence of objectionable odor, and the quality of being more readily soluble, which makes it more quickly effective upon plant growth.

For a new lawn, broadcast evenly 30 to 40 lbs. per 1000 square feet. To stimulate an old lawn, apply 20 to 30 lbs. per 1000 square feet, during the growing season, wash it down immediately with the hose to prevent burning. For flowers and vegetables, use from 4 to 6 lbs. per 100 square feet. Price, 100 lbs., \$3.00; 1000 lbs., \$25.00; 2000 lbs., \$45.00.

## Vaughan's Balanced Plant Ration. (5-8-7)

This is our best brand of concentrated manure, excellent for mixing into potting soil or as a top dressing. It is a money-maker. For potting soil, use about 20 pounds to a cubic yard of soil, and for the dressing scatter it about as thick as lawn grass seed is sown, after loosening the surface of the soil. It is excellent for Carnations if applied by the end of October or in November. It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. Price, 100 lbs., \$3.25; 1000 lbs., \$25.00; 2000 lbs., \$45.00.

**Adco. Artificial Stable Manure.** Convert all non-woody vegetable refuse such as stalks, cuttings, weeds, withered leaves and flowers, vines, etc., into artificial manure. A 25-lb. bag is enough for 12 wheelbarrow loads of waste, making  $\frac{1}{2}$  ton of manure. Price,  $7\frac{1}{2}$ -lb. bags, each, 85c; doz., \$8.40; 25 lbs., \$2.00; 150 lbs., \$10.50. # Freshly Packed and Tested Lawn Seed in 1942 for Your Unsold 1941 Stock

## Federal Seed Law Requires Dated Germination Tests

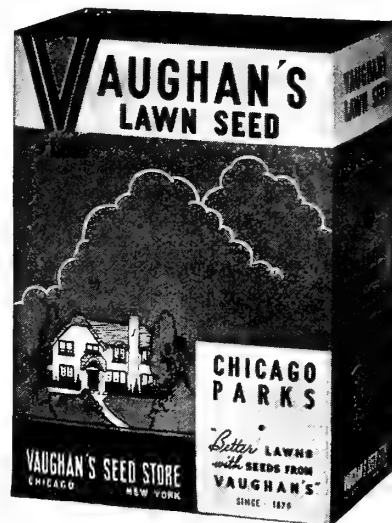

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us by December 1, 1941, and replacement will be made by March 1, 1942.

NEW CARTON OF MODERN DESIGN SUPPLIED IN ALL SIZES UP TO 5 LBS.

### For Your Protection

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe. With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

### Vaughan's No. 25 Lawn Mixture An Economy Mixture Containing NO TIMOTHY

This blend fills the demand for a mixture which is both inexpensive and at the same time free of objectionable timothy so widely used as a lawn seed adulterant. Our No. 25 has, as its chief ingredient, the grass which is used for winter putting greens on southern golf courses. It comes up as quickly as timothy, will last longer and makes a fine appearance if kept cut.

I agree to display this assortment and the advertising material sent with it, in my store, and to sell all the seeds possible. **O**UR packet seeds are supplied on consignment on the usual terms, but with unusual display material and a unique method of direct delivery to you by parcel post. An assortment of flower seeds, or both flower and vegetable seeds as you choose, is sent you on consignment, to be sold at 40% commission. All flower seeds are 10 cents or more; some vegetables 5 cents, most 10 cents. Each rack is dated and bears a seed analyst's certificate of the purity and freshness of its seeds. At the end of the season you return the unsold packets in a bag supplied by us, and destroy the rack. You are credited with the returns and billed for the seeds sold, less 40%.

## Brilliant New Floor Display Racks

We continue for 1941 our floor display which was so popular and effective the past season.

The illustration shows how it holds each variety of your seed assortment where the customer can see it. Against the black background the vivid colors of the seed packets stand out like a veritable flower garden, catching the eye of everyone who comes near it and inviting further inspection.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets retail value.

*Our New Packets.* All flower seed packets of 1941 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower seed or vegetable seed packets or both.

*Brilliantly Colored Posters and Streamers.* Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

Gladiolus Display Box Holding 500 1st Size Bulbs, 50 each of 10 Named Varieties

## \$7.00

Retails for \$15.00

F. O. B. Chicago or New York

**V**AUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) include the show winners **Picardy, Mammoth White, Mrs. F. L. Karcher, Wasaga, Dearborn, Edith Mason, Cadillac, Minuet, Kalamazoo, Bagdad**—none better known. The price to you is \$7.00 for the box and 500 bulbs of 10 named varieties. You retail them for 35c a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. After the display box and first collection have been bought, refill orders will be accepted for \$6.50 for 500 bulbs, 50 each of 10 varieties, in bags of 50; or \$12.50 for 1,000 bulbs, 100 each of ten varieties. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value. **Varieties Subject to Change Without Notice.**

HOLLYHOCK ORANGE PRINCE

# Unwin Dwarf Hybrid Dahlias XXX Strain

A Wonderful Item for Mother's Day

DAHLIA UNWIN'S DWARF HYBRIDS

The plants are dwarf, semi-double flowers of the most attractive form in fine range of color. Seed sown in March, plants will be in bloom by end of June.

Seed sown in January and early February and grown cool will make fine pot plants for Mother's Day. For spring plant sales, sow in March and April. These Dwarf Dahlias are very popular for border planting and bedding work.

We drilled in seed in our Trial Grounds on June 24th of this year (1940) — the plants flowered in eight weeks and made fine tubers before frost. If tubers are divided and potted up in February (start in cool house) they make fine plants for Mother's Day.

Trade Pkt., 25c;  $\frac{1}{4}$  oz., 60c; oz., \$2.00;  $\frac{1}{4}$  lb., \$6.00.

## New Giant Double Hollyhock

The flowers are of a uniform color, of good size, late in flowering season, and produced abundantly on dwarf bushy plants about 10 inches high. Extra-choice variety for pot plants.  $\frac{1}{2}$  trade pkt., \$1.25. 1 trade pkt., \$2.00.
